Gangavarapu Murari

g.murari2006@gmail.com 8499960017 Gangavarapu Murari gmurari2006

Summary

Bachelor of Technology student in Computer Science and Engineering (AI & ML) with a strong interest in artificial intelligence, machine learning, and full-stack development. Hands-on experience building practical applications such as AI App Compiler, TinyFormAI, an intelligent timetable generator, and a document question-answering system. Analytical, self-motivated, and disciplined, with a passion for applying technology to solve everyday problems.

Education

G. D. Goenka University 2024 – 2028
B.Tech in Computer Science and Engineering – CGPA: 8.56

Krishnaveni Junior College
Intermediate (12th)

Triveni Talent School
SSC (10th)

Projects

AI App Compiler - AI-Powered Full-Stack Application Generator

- Engineered a platform that converted natural-language requirements into full-stack application blueprints and complete source code.
- Automated database schema generation, backend API creation, frontend page generation, and project packaging using Python and FastAPI.
- Deployed a web-based dashboard featuring a code explorer, project metrics, and downloadable project export, hosted on Render Cloud.

TinyFormAI - Offline AI System

- Built a lightweight application that ran entirely offline, enabling efficient processing without internet dependency.
- Prioritized data privacy by keeping all computation on-device.

Intelligent Timetable Generator

- Designed a constraint-based system that automatically generated conflict-free class schedules.
- Reduced manual scheduling effort by optimizing time-slot allocation through logic-based rules.

Chat with PDF System

- Created a tool that allowed users to query PDF documents in natural language and receive accurate, context-aware answers.
- Improved document comprehension workflows, laying the groundwork for AI-powered chatbot applications.

Technical Skills

Programming: C, Python, Java
Data & AI: Machine Learning, Data Analysis
Tools & Platforms: Excel, Pandas, NumPy, VS Code
Concepts: Optimization, Problem Solving, Algorithms
Soft Skills: Analytical Thinking, Communication, Teamwork

Achievements

- Participated in the India AI Summit 2026.
- Won second prize in a coding competition.
- Completed the Claude AI course.
- Created and deployed the AI App Compiler.
